7.6. Proposals falling Outside CRZ area:

7.6.1. Request of NOC from S.C. Fisher Women's Multi purpose Primary Co-operative Society Ltd for construction of building at Malpe Fishing Harbour at Sy.no: 265/1A2 of Kodavoor Village, Udupi Taluk (FEE 11 CRZ 2012)-reg.

The following points were brought to the notice of the Authority by Regional Director (Environment), Udupi:

S.C. Fisher Women's Multi purpose Primary Co-operative Society Limited has submitted application for CRZ clearance for their proposal of setting up of office building (to carryout banking and shopping complex) inside Malpe Fishing Harbour in 200Sqm area of Government land at Sy.No. 265/1A2 of Kodavoor Village, Udupi Taluk and District. This is a non-residential project.

As per the site plan submitted by the project proponent and attested by Regional Director, Environment the project details are as follows:

Plot Area is 300 Sqm (15 mts x 20 mts); Building area : 189.68 Sqm; passage : 34.38 Sqm; set back : 75.94 sqm. The ground floor plinth area is 2041 Sqft. 1<sup>st</sup> floor plinth area is 2041 Sqft. It is proposed to construct a RCC Building with 2 floors (G+1) have been 8 rooms of 165 Sqft each. The estimated cost is Rs. 25.85 Lakhs.

The project site was inspected by Regional Director (Env) and has reported (vide letter dated 05.01.2012) that the project site is at a distance of more than 500m from HTL of Sea and as per CZMP the site falls in CRZ-III. The nearby jetty is 50m away. Since the jetty was taken as HTL and 500m from here is marked as CRZ, this site falls in NDZ as per approved CZMP. It is more than 200m from Udyawara river. As per CRZ Notification-2011, the CRZ jurisdiction is 500m from Sea HTL and maximum of 100m from river. In both ways the proposed site is outside CRZ area. Further, the Regional Director (Env) has reported (vide letter dated 27.07.2013) that CRZ Jurisdiction is 500m from sea HTL and restricted to a maximum of 100m from river and not from the man made jetties that have been constructed subsequently. Considering this, it is opined that the proposed site of the proponent falls outside CRZ jurisdiction as per CRZ Notification-2011.

The Regional Director (Env) has forwarded the Request letter of the proponent, Application in prescribed format, Government order No. ಪ ಸಂ ಮೀ. 68 ಮೀ ಇಇ 2010 dated 21.08.2010, Project report, RTC of the site, Survey map of the proposed

project area, Building plan, CZMP sheet no.23 and Draft digitized map showing the site.

The proposal has been recommended in DCZMC meeting dated 07.06.2014 decided that the proposal is outside CRZ area with a request to issue NOC.

The Authority agreed with the recommendation of the DCZMC meeting held on 07.06.2014 that the above proposal is outside CRZ area and decided to issue NOC as per the provision of CRZ Notification 2011 with the following conditions:

- a) The project proponent should construct and maintain a compound wall all round the building.
- b) The project proponent shall take measures to prevent air and water pollutions as air act and water act following KSPCB norms.
- c) The project proponent shall ensure that no solid or liquid waste generated in the proposed building is discharged into the sea or water bodies.
- d) The occupier shall earmark location for collection of solid, hazardous and e-waste in the building and dispose them scientifically.

#### **7.7 CRZ Clearance for proposals for removal of sandbars in Rivers in Uttara Kannada District. (FEE 1067 CRZ 2014)**

The following points were placed before the Authority:

The MoEF, GoI has issued Office Memoranda dated 24.02.2011, 09.06.2011 and 08.11.2011 regarding removal of sand bars which are inhibiting free movement of fishing vessels, boats etc in the Coastal Regulation Zone (CRZ) area of rivers/estuaries.

As per the O.M. dated 08.09.2011, the Deputy Commissioner shall Chair a seven-member Committee consisting of concerned officials (from State Departments such as PWD & IT, Water Resources Department, Fisheries Department etc) as also at least one representative of each from a Scientific or Technical Institute, the local communities, like fisherfolk and the local civil society. After identification of such impeding sand bars by the District Committee, a detailed technical report may be prepared with the help of NIT, Surathkal and placed before the Committee as mentioned in the said O.M. Based on the recommendation of the above Committee and technical scrutiny of such reports by NIT, Surathkal, the Deputy Commissioner may submit the proposal for removal of sand bars in CRZ for KSCZMA for CRZ approval followed by Environment Clearance from SEIAA-Karnataka. Thereafter the Deputy Commissioners may take action to remove the sand bar.

1. Deputy Commissioner, Karwar vide letter dated 26.08.2014 has submitted the proposals for CRZ Clearance from KSCZMA and further environment clearance from SEIAA for removal of sand bars located in CRZ area in Uttara Kannada District.
2. The Deputy Commissioner has reported that as per the O.M dated 08.11.2011 issued by MoEF, GoI a seven- Member Committee under the Chairmanship of DC has identified the sandbars. NITK Surathkal has technically scrutinized these

- sandbars and submitted the report. The Seven Members Committee under the Chairmanship of DC has approved the proposals for removal of sandbars in its meeting dated 22.08.2014. The DCZMC in its meeting held on 22.08.2014 has also approved these proposals (except proposal in File No. FEE 1069 CRZ 2014 vide Annexure) and recommended to KSCZMA along with application as per CRZ Notification, 2011 and sketch submitted by DD, DMG, Karwar.
3. The DC has reported that for want of Environment Clearance from SEIAA-Karnataka, removal of sand from sandbars in the district has been completely stopped and there is non-availability of sand even for development and construction activities in the District. DC has requested for issue of CRZ Clearance followed by EC from SEIAA, Karnataka.
  4. In the proposal the Seven Members Committee has informed that the team of officers from DMG, Revenue Department, PWD, KSPCB and CRZ officials had joint inspections of the sandbars using CRZ maps along with traditional community people and has identified the sandbars. While identification of sandbars, ecologically sensitive area and fish breeding areas (CRZ-I) were excluded. Identified area has been marked in the CRZ maps. Assessment of removal of sand was made by considering 0.5 m thickness of sandbar but NITK in its report has made a point that it is better to consider 1.2m depth for removal purpose as the rivers are getting replenished throughout the year and it is assessed accordingly.
  5. Non-mechanized dinghies or small boats are being used for removal of sand by traditional coastal community without using any machinery by using bamboo poles, baskets/buckets by human beings. The removal of sand is completely manual by human efforts by hands and collected in baskets or by bamboos scoping and collected inside the mesh. Then it is loaded in the Nadadoni. The collected sand will be stocked at river bank owned by traditional communities/port land (dakke). The removal of sand will be continuing till the completion of specified quantity which enables the smooth navigation at the demarcated place. During removal of sand following condition will be followed by the registered traditional communities:
    - a) Sand should not be removed to the depth beyond average bed level.
    - b) If bank or bed erosion takes place sand should not be removed.
    - c) Sand removal from the river bed other than the identified sand bar is prohibited.
    - d) Sand should not be removed near nay vegetation or mangroves growth.
    - e) Use of any mechanical methods for removal of sand is strictly prohibited.
    - f) If any damages to ecological system and the environment are observed, removal of sand should be stopped.
    - g) Only day time (6am to 6pm) sand may be removed.
    - h) No instruments/materials should be left behind in the river course.
    - i) Minimum distance of 2 meter should be maintained from river bank for stocking of sand.
    - j) In order to safe guard the river banks and roads sand removing/transportation along the river banks should be prohibited in monsoon season i.e. June 15 to August 15.

Further the District Sand Monitoring (CRZ) Committee has decided to dispose the sand through registered traditional community people by collecting Royalty and other statutory taxes through Department of Mines and Geology. Sand will be transported by using valid mineral dispatch permits (MDP) in order to regulate illegal sand transportation/mining activity in CRZ and non CRZ area.

The DC and Chairman District Sand Monitoring (CRZ) Committee, Uttara Kannada District as enclosed application in prescribed Form-I, Sand bar maps and Assessment details chart, Report on sandbar removal from rivers of Uttara Kannada District prepared by Prof. S.G. Mayya, the Chairman of Civil Engineering Department NITK, Surathkal, District Sand Monitoring (CRZ) Committee meeting proceedings dated 22.08.2014 and DCZMA meeting proceedings dated 22.08.2014.

The details of 21 proposals submitted by DC, Karwar are enclosed at **Annexure**.

The Deputy Director, DMG, Karwar who was present in the meeting clarified that the Seven Member Committee as required under OM dtd. 08.11.2011 issued by MOEF, Government of India for Removal of Sand in the CRZ area of rivers/estuaries by manual methods by traditional communities has been constituted. The Authority observed that in respect of the proposal vide File No. FEE 1069 CRZ-2014, the DCZMC has rejected the proposal for removal of Sand from Sand Bar "SB-KL-4" of Kali river in Karwar Taluk, Uttara Kannada District for the following reason:

The local residents of Karge Joog river island coming under Wailwada Gram Panchayat have represented that the Mangroves planted along the river bank to prevent land erosion due to sand transportation have been completely uprooted by people while loading the sand and they have requested that it would be suitable if the removal of sand from sand bars located close to the Karge Joog river island is with held temporarily.

After deliberation, the Authority decided to issue CRZ Clearance for the 21 proposals listed in the Annexure except the proposal in File No. 1069 CRZ 2014 for removal of Sand from Sand Bar "SB-KL-4" of Kali river in Karwar Taluk, Uttara Kannada District with the following condition in addition to the conditions enumerated in para 5(a) to 5(j) above:

- i) The Deputy Commissioner may permit removal of sand bars in the specified time period in a particular area alongwith specific quantity subject to such conditions, such as registration of local community persons permitted to remove the sand manually.
- ii) The Environmental Official at district level shall monitor the removal of sand and submit report to the Deputy Commissioner, as may be specified, say quantity of sand removed in the period concerned.
- iii) The above permit shall be renewed on yearly basis.
- iv) The agenda and the minutes of the Seven Member Committee, permits issued by Deputy Commissioner and monitoring reports of the removal of sand would be uploaded on the website of the Deputy Commissioner' office and also made

available hard copy to Zila Parishad etc., as may be directed by the Deputy Commissioner.

- v) The accumulation of sand bar, its removal the process etc., shall be monitored by Deputy Commissioner with the help of satellite imageries, GPS, etc. It shall be ensured that the permits are not accorded in such areas which are identified as eco-sensitive zones, fish migratory and breeding grounds. The permits shall be given taking into consideration the local circumstances and ecological settings.
- vi) Deposit in the sand bars above the level of river bed only shall be removed by way of bar skimming and no pit excavation shall be permitted.
- vii) The sand deposits within the buffer zone of 50 meters from the existing mangrove shall not be disturbed.
- viii) Sand bars in the known breeding and spawning grounds shall not be disturbed. Removal of sand bars during the monsoon season which is generally the breeding season for the aquatic fauna shall be avoided.
- ix) No pits in the river bed shall be formed as it tends to alter the entire river dynamics.
- x) Sand bars at the vicinity of bridges and other engineering structures and the river banks shall not be disturbed.
- xi) The project authorities shall ensure that removal of sand bars do not disturb the habitants in order to conserve benthic flora and fauna that inhabit the sandy substrata.
- xii) The project Authorities shall apply before SEIAA, Karnataka for Environmental Clearance for sand bar removal.
- xiii) The Authority reserves the right to cancel the NOC given under CRZ Notification for sand bar removal incase of any violation in the interest and conservation of coastal environment without giving any notice.

### **7.8 Development of Multipurpose, all weather Sea Port a Tadadi, Karwar, Uttara Kannada District, Karnataka on Public Private Partnership basis (FEE 1066 CRZ 2014)**

The following points were placed before the Authority:

1. The Government of Karnataka Vide G.O.No.IDD/78/ITS/2009 dated 09.12.2009 has accorded approval for the Development of Multipurpose, all weather Sea Port a Tadadi, Uttara Kannada District, Karnataka on Public Private Partnership basis with KSIIDC as nodal Agency. The port is being designed to initially handle about 34.25 MTPA of Cargo with final designed capacity of 62.360 MTPA.
2. The MoEF, GoI has examined the proposal and have issued the Terms of Reference vide their letter F.No.11-28/2011-IA.III dated 26.09.2011 and the validity of the TOR is extended upto 25.09.2014 vide letter F.No.11-28/2011-IA.III dated 02.19.2013.
3. The following studies have been completed for implementation of the project:
  - a) A detailed feasibility report by consortium of M/s. Prointec, Sprain and M/s. Mir Project & consultants;
  - b) Environmental Impact Assessment study report by National Environmental Engineering Research Institute, Nagpur. The KSIIDC has informed that the report is under finalization and only Executive summary is submitted.

- c) Report on CRZ Demarcation of High Tide Line and Delineation of CRZ boundaries prepared by National Institute of Oceanography (through NEERI), Goa.
4. The KSIIDC vide letter dated 18.08.2014 has requested KSCZMA for approval for location of the Tadadi Sea Port in the CRZ and communicate the same to MoEF.
  5. Application For CRZ Clearance as per Para 4.2 of CRZ Notification-2011 is not submitted. Further only filled up MoEF-questionnaire for environmental appraisal for ports and harbours and only executive summary of the EIA report (NEERI) is submitted.
  6. This is a proposal within the CRZ area requiring waterfront and foreshore facility requiring CRZ Clearance under Para 4(f) of CRZ Notification-2011 and also requiring Environment Clearance from MoEF, GoI under Para 7(e) of EIA Notification-2006 with more than 5 Million TPA of cargo handling capacity. General conditions shall apply.
  7. The following points are noted from the MoEF, questionnaire for environmental appraisal for ports and harbours as well as executive summary of the EIA report (NEERI):
    - i) Karnataka State Industrial and infrastructure Development Corporation Limited (KSIIDC) has proposed to develop a port at Tadadi. The port is to be constructed in the PPP (Public Private Partnership) mode on DBFOT (Design, Build, Finance, Operate & Transfer) basis. The port is being designed to initially handle about 34.25 MTPA of Cargo with final designed capacity of 62.360 MTPA.
    - ii) For development of port at Tadadi, the Karnataka Industrial Area -Development Board (KIADB) had acquired a total of about 1416 acres of land in Hilalmakki, Yemmemadi, Midlagazzani, Hiregult, Morba, Torke villages.
    - iii) This is a minor port located at latitude 14°32.40' N and longitude 74° 22.03' E. The backwaters of the river have huge waterfront area, which make the location a natural harbour. At present it is a fair weather lightrage fishing port situated on the estuary of the Aghanashini River at a distance of about 50km from Karwar, about 24km from Belekeri and approximately 35km from Honnavar.
    - iv) The Konkan Railway Line and National Highway (NH-66) pass very close to the port site. The nearest station on the Konkan Railway line is Ankola, which is at a distance of about 25km from Tadadi.
    - v) Tadadi port has been designed to have seven berths namely, Two berths each for export of iron ore and import of coal, two multipurpose berths for export of steel products and one multipurpose berth for general cargo and containers.
    - vi) The project is not connected to any inland waterway system. No polluting industries are located in the vicinity of port. There is not provision for dry dock. Three warehouses of 5000Sqm each planned. There is no housing facilities proposed inside the proposed port.
    - vii) 33% of the total area of the port is proposed for greenbelt. 6KLD of treated sewage from STP will be used for greenbelt.

- viii) The area to be reclaimed is 10, 71,000 Sqm.
- ix) Emergency response plan and contingency plan are yet to be prepared.
- x) Aversa, Gokarna and Om beach are places of tourist importance located around.
- xi) Fresh water source in the region is ground water.

8. Conclusions drawn by NIO, Goa in the report of demarcation of HTL and Delineation of CRZ boundary for the proposed port:

- The entire purported property is engulfed by the Tadadi River water and is the part of the creek system and thus becomes the intertidal area.
- The entire plot boundary is covered with mudflat and contains environmentally sensitive and ecologically fragile areas as specified in the Coastal Regulation Zone notification and is classified as CRZ-I(B).
- The entire purported property is waterfront side of HTL and a setback line 150m is drawn parallel to the HTL configuration.
- The property contains mudflat, dense thick to sparse mangroves growth all round it.
- Extensive reclamation will have to be carried out for the project and infrastructure which in turn will affect the creek circulation pattern.
- Buffer zone of 50m were drawn for mangroves as per MoEF guidelines of 100 Sqm and the same is classified as CRZ-I(A).
- The area between 50m buffer zone and 150m set back line is classified as CRZ-III.
- The HTL may change if any of the existing morphological features are altered.—

A preliminary presentation was made before the Authority by Sri. N.R.N. Simha, Dy. General Manager, KSIIDC highlighting salient features of the proposed port. However, the Authority observed that the project proponent has not submitted the following prescribed documents seeking prior CRZ clearance to the KSCZMA in accordance with the procedure as per para No. 4.2 of CRZ Notification No. S.O. 19(E) dated 06.01.2011.

- (a) Form-1 (vide Annexure-IV of the CRZ Notification-2011);
- (b) Rapid EIA Report including marine and terrestrial component.
- (c) Comprehensive EIA with cumulative studies for projects in the stretches classified as low and medium eroding by MoEF based on scientific studies and in consultation with the State Government.
- (d) Disaster Management Report, Risk Assessment Report and Management Plan;
- (e) CRZ map indicating HTL and LTL demarcated by one of the authorized Agency (as indicated in para 2) in 1:4000 scale;
- (f) Project layout superimposed on the above map indicated at (e) above;
- (g) The CRZ map normally covering 7km radius around the project site.
- (h) The CRZ map indicating the CRZ-I, II, III and IV areas including other notified ecologically sensitive areas;
- (i) No Objection Certificate from the concerned State Pollution Control Boards or Union territory Pollution Control Committees for the projects involving discharge of effluents,

solid wastes, sewage and the like.

After deliberation the Authority deferred the subject with suggestion to the project proponent (KSIIDC) to submit all the details/documents required as above. Further it was also decided to obtain the report of the studies on Aghanashiri Estuary conducted by EMPRI or any other agency and place before KSCZMA for further consideration.

The meeting ended with thanks to the Chair.
